SUMMARY

Data-driven operations and project management professional with 3+ years of experience in logistics optimization, KPI reporting, cross-functional execution, and reporting automation. Proven track record of using order trends, cost metrics, quality data, and customer insights to improve routing decisions, support planning, and drive measurable efficiency gains.

PROFESSIONAL EXPERIENCE

Gofo — Pickup Supervisor

Chicago, IL | May 2026 – Present

- Reduced regional pickup cost by 50% while supporting a 2x increase in order volume through route optimization, load-efficiency improvements, and tighter execution control.
- Analyzed weekly order volume, channel mix, and trend data to guide routing, capacity planning, and ZIP code expansion from Chicago metro to 15+ regional markets, contributing to a 35%+ increase in customer base and supporting higher pickup demand.
- Partnered cross-functionally with drivers, dispatch, overseas warehouse teams, clients, IT, and management to resolve operational issues, maintain service quality, and support customer experience as volume scaled.
- Built internal Python-based reporting workflows and dashboards for order trends, sign-in rates, carrier mix, and week-over-week reviews, improving management visibility and operational decision support.
- Segmented customers into four groups and identified high-risk churn accounts to support retention-focused follow-up, while using quality-control and KPI data to diagnose root causes and drive corrective actions.

YangTze River Consulting Service LLC — Data Analyst

Sep 2024 – Mar 2026

- Built document and resume-parsing workflows using Flask, LangChain, SpaCy, and vector storage to automate information extraction from unstructured files.
- Improved resume information extraction accuracy by 25% through custom NER configuration and domain-specific labeled data.
- Processed 3,000+ unstructured documents, achieving 60% reduction in manual review time.

Clinpharma Consulting Global Group — Data Analyst

May 2023 – Aug 2024

- Developed predictive and retention models using transactional and user-behavior data to support distribution planning, churn analysis, and retention strategy.
- Conducted business analysis and visualization in Python and Tableau to identify regional and behavioral trends and support marketing decisions.

Global Technology Specialists Partners — Data Analyst & Project Manager

Jan 2023 – Apr 2023

- Analyzed user behavior and sales data to forecast product demand and support supplier planning.
- Managed end-to-end project lifecycle including requirements gathering, sprint planning, risk tracking, and weekly stakeholder updates, ensuring on-time milestone delivery across a 4-month timeline.

SELECTED PROJECTS

Internal Logistics Reporting Tool | Python, NiceGUI, Pandas, Altair, OpenPyXL

- Designed and maintained an internal reporting application to automate Excel-based data processing, daily report generation, and weekly chart production for logistics workflows.
- Built driver-level weekly analysis workflows covering tasks, work hours, mileage, fuel data, and workload metrics to support operational review.

SKILLS

Analytics & BI: Python, SQL, Excel, Tableau, Power BI, Pandas, KPI Reporting, Dashboarding, Operational Analytics

Tools & Frameworks: NiceGUI, OpenPyXL, Flask, Jira, Reporting Automation

Databases: MySQL, Microsoft SQL Server, MongoDB

Core Competencies: Process Improvement, Root Cause Analysis, Cross-Functional Coordination, Agile/Scrum, Stakeholder Management, Risk Mitigation

EDUCATION

Northeastern University — M.S. in Project Management | Boston, MA | 2023

Wuhan University of Technology — B.A. in Public Utilities Management | Wuhan, China | 2020
